“These Little-Known, Undervalued Stocks Should Easily Double Your Money ... No Matter What the General Market Does!”

Dear Friend,

I've just completed a special report that will totally change the way you think about your investing. It will give you peace of mind ... and big profits.

It's called ***“8 Little-Known, Undervalued Stocks to Double Your Money ... No Matter What the Market is Doing”***. And I want to send it to you **ABSOLUTELY FREE**.

In your FREE REPORT, I will reveal 8 undervalued stocks you should own right now ... before they take off. These are solid, undervalued stocks in undervalued sectors that are poised to make big profits no matter what the stock market does. Here's a little taste of what you will discover:

**Request

Report
Now!**

This gem is a leading service provider in the war on terrorism. It has doubled in value three times, yet still trades for an unbelievably low single digit multiple of earnings. As the war on terror heats up, earnings are increasing on a double-digit basis. I expect this stock to **more than double** again very soon.

This established industry leader was nearly broken by the excesses of the recent technology bubble. Its shares took an unbelievable dive from \$100 to under \$3 per share. Fortunately, it has repaired the damage and is poised to rebound significantly. Buy now and hang on as this stock **rises to \$5 a share** within the next year.

Along with the whole housing sector, this stock was hammered hard for no reason other than fear mongering. Its stock, once regularly trading over \$35, plummeted to less than \$14. Now it is trading at less than 4 times its steadily increasing earnings. As the market adjusts and demand increases, it is positioned for **astronomical earnings in the very near future**.

You will get every exciting detail on these and 5 additional super value stocks FREE in the report I have reserved for you right now. Best of all, you will see exactly how I select incredible stock values -- stocks that are priced so low, they are practically guaranteed to increase in price -- using my “Rational Investing” strategy.

Continued ...

Real investing for real people.

My name is James Dlugosch. I'm an average guy like you. I have a family ... bills ... responsibilities ... and a future to plan for. I know I can't afford to take crazy risks on stocks in the hope of getting lucky and hitting a "home run". And I can't afford to squander my money in so-called "safer" investments that barely pay 2% interest. Neither can you.

You don't gamble with your health. You don't throw caution to the wind while driving your car. So why would you want to take unnecessary risks with your investments? The good news is, you don't have to!

I cut my teeth in the world of investing with the late Al Frank as my mentor. Al was the investment "guru" that all the other top advisors followed because of his 25 year track record for consistently beating the market (most recently by 63% annually). Working with Al, I fine-tuned his value investing methods into my own Rational Investing strategy.

(((The good news is that with my proven Rational Investing strategy, you can still make extraordinary profits investing in stocks without worrying about what the market is doing. And without giving away profits in mutual funds, CDs and money markets.)))

I like to think of Rational Investing as real investing for real people. It's the way you would do it yourself, if you had the time and resources to do all the necessary research.

The proven, safe, "Rational" way to make up to double your money.

While everyone else struggled in 2002, my personal investment portfolio made 35.7% profit and beat the market by 233%. So far this year, I'm up 19.1% and beating the market by another 233%. Using my proven, rational investing approach proven for over 25 years, I have no doubt I'm going to continue this success.

Here's documented proof of a few of my recent trades:

53.7% PROFIT on AOL ... **77.7% PROFIT** on CMVT ... **61% PROFIT** on F ... **85.1% PROFIT** on KLIC ... **56.6% PROFIT** on LU ... **82.7% PROFIT** on NSM ... **77.9% PROFIT** on OMX ... **87.9% PROFIT** on SSYS ... **57% PROFIT** on TOY.

Now I'm inviting you to become a charter subscriber to my Rational Investor advisory so you can make these safe, rational profits for yourself right along with me.

NOT just another newsletter.

The Rational Investor is NOT just another investment newsletter; it is an investment advisory service.

There's absolutely no guesswork for you. Using instant emails and monthly updates I tell you exactly what to do. You will know exactly what to buy or sell ... and when ... for investment profits that consistently beat the market.

Nothing is easier. You don't have to learn any system, read any charts, study any articles, interview companies, follow industries or sectors ... conduct analyses ... none of that. I do all that work for you! And because my Rational Investing strategy is proven to maximize profits and minimize risk in any market, you never have to worry about your nest-egg.

Maybe the most important thing that separates The Rational Investor from all the others is ...

I put my money where my mouth is.

Nothing is easier than for someone else to tell you what to do with your money. The only person I would trust with my money is someone who follows his own advice. That's exactly what I do!

My Rational Investor portfolio is a real account in my name with Brown & Company. I never recommend a single trade that I do not actually make with my own money. What's more, I will not buy or sell stocks from my own account until after I notify you of each trade. So I never have an advantage over you, because I always trade at the same time or later than you do.

The independent stock research firm of Henry Schafer Partners calculates the performance of my portfolio every month. And every month I open my books and share all the details with you in my Rational Investor newsletter.

This is the common-sense way to more than double the market ... and sleep like a baby every night.

I'll be the first to admit that my proven record of consistently making more than double the S&P500 and Dow is not for everybody.

Some people love taking huge risks. I don't.

Some like investing in companies with questionable pasts and risky futures. I don't.

Some people enjoy the thrill of laying awake at night worrying because their investment feels more like gambling than investing. I don't.

Some may even consider my way of consistently making extraordinary profits and beating the market boring. I call it rational. Here are typical examples from just a few months ago:

I bought Metris Companies (MXT) at \$1.62. It was trading way below book value due to some internal problems, but they were now cleaned up. I sold two months later at \$2.51 and pocketed a neat **55% profit.**

I bought Tesoro Petroleum (TSO) at \$1.39. The market had priced it as if the company was headed for bankruptcy. But my research revealed that was not the case at all. I sold it at \$4.66 for **235% profit in two months.**

I bought Advanced Micro Devices (AMD) for \$3.61 when the "experts" were expecting a collapse. But to me, AMD was a niche leader at a good price. I sold at \$6.87 for a **90% PROFIT.**

My solid, undervalued stock selections are your ticket to a richer, worry-free life.

As a Rational Investor, we live in the real world. So I won't promise you'll make 1,000% profits. And I won't tell you that all my picks are winners. But I will tell you that because of my extensive research and analysis, the winners far outnumber the losers. My Rational Investing strategy minimizes risk so you will still beat the market handily and net extraordinary overall profits.

There is only one way to large, safe consistently superior profits no matter what the market is doing. That is to buy stocks in solid, but undervalued companies. And that's what you'll get from me. No hype. No exaggerations. Just the facts you need to make a solid buy or sell decision.

To get your FREE REPORT and join me making steady, safe, market-beating profits, all you need to do is call 1-866-471-8089 right now, or mail the enclosed Risk-Free offer card. I will rush out your

FREE Report, and you will immediately receive all subscriber benefits, including:

- 1) One full year of E-mail alerts
- 2) One full year of access to the members-only area of The Rational Investor website
- 3) 12 monthly issues of The Rational Investor newsletter.

Save 50% on a risk-free charter subscription!

My regular subscription price is a ridiculously low \$399 per year. But if you request your no-risk trial charter subscription within 5 days, you will receive all subscriber benefits for only \$199. That's \$200 OFF -- but only if you call 1-866-471-8089 or mail your Risk-Free offer card within the next 5 days.

Money back guarantee ... forever!

I know you need to see results for yourself. I know you need to be satisfied. That's why I have eliminated all risk! Not just for 30 or 60 or 90 days ... but forever!

If you are EVER not 100% thrilled with The Rational Investor for ANY reason -- just let me know. I will send you a full refund for all unmailed issues. And you get to keep your FREE Report ... even if you cancel for a full, pro-rated refund.
