"Here's My Proven, Easy Way To Make 100%, 200%, Even 300% Or More Profit Every 60-90 Days So You Can Be Financially Independent!"

-- George Fontanills

Dear Fellow Investor,

Stocks are good if you want to wait many decades to reach your retirement goal (and hope you are healthy enough and have enough energy to enjoy it then).

However, I'm here to tell you that you can reach your goal much faster by making profits of 100%, 200%, even 300% every two or three months like thousands of other open-minded investors do right now.

Think what this means: you'll be able to retire earlier ... start living the good-life earlier ... be free of stress and worry earlier ... do what you've always wanted to do, and have the time and money to do it!

The Real Proof Is In What These People Like You Have To Say

The fact that I have developed and mastered a powerful, low-risk, high-profit secret may be nice for me. But the real proof is that thousands of students from all walks of life, all over the country prove that it will work for you, too!

Just look at these typical comments from a few of the average Americans who have learned and use my secret (your results may vary):

"I made on my very first trade after I started this program, over \$30,000. Then on my second trade -- I made a little over \$17,000. This year in the first 4 months, I've made a little over \$70,000!" -- Dore R., CA

"I cannot thank you enough for what you have taught me. I used to toss and turn at night and when I woke up in the morning (full of anxiety) ... I would be praying 'Please God, let the markets be up.' Now I am sleeping well and waking up in the morning saying, 'I can't wait to see what the market is doing!'" -- Rob C. CA

"I was able to get into the trade, make \$40,000 in less than 12 days and get out of the trade." -- Mike W., CA

"I made \$3,000 in 3 days! In 2 months I earned \$15,000!"

-- Rise W., CA

"I produced a profit of \$15,000 in just 5 days!" -- Adalberto A., Brazil

"As a small trader, I started with \$2,000 -- and now have \$7,000!" -- Michael G., LA

Here's what I mean.

Think of your favorite stock right now. Go ahead and get a name in your mind.

Now if that stock increases in value by, for example, 25% over the next year, you make 25% profit.

But I have perfected the secret to making double or triple your money on this exact same favorite stock of yours ... in just 60-90 days ... with no previous experience!

I'm so excited. I want to share this secret with you as I have already with thousands of others. But first, you're probably wondering who I am and why you should pay any attention to me at all.

My name is George Fontanills. My friends say I'm a regular guy who enjoys a good game, a good drink and good friends. Shortly after graduating with my MBA, I was itching to put my analytical skills to use. So I began a study to see if I could identify fool-proof factors that made the difference between stock market winners and losers. What my analysis revealed was both shocking and life-changing!

Risking my own money, I tested and re-tested my conclusions and discovered an amazing secret that mathematically controls risk and maximizes profits every time a trade is placed.

Do you see what this means? Do you see how different this is from regular stock trading? Do you see how this can change your life?

With my method there is virtually no stress! No mystery! No worry! Every trade made with my innovative approach comes with a built-in protection against unbridled loss ... with the ability to make double-and-triple-your-money profits within just a few months!

Thanks to my unique discovery and trading approach along with the testimonials of thousands of my "students", I've gained the reputation as "one of the most successful investors on Wall Street".

Now I want to share this easy secret with you so you can build your wealth this fast, easy, high-profit, low-stress way!

**I've Spent Years Developing And Proving
This Method So You Can Short-Cut The Learning Curve!
Spend Just 10 Minutes A Day And
You Can See Huge Profits Next Week!**

I know that none of my credentials are worth a hill of beans to you unless my system will help YOU make lots of money quickly and easily!

And I understand that it's taken you years of trial-and-error to learn how to invest successfully in the stock market. The last thing you need is a lengthy and messy trial period while learning how to do things my way.

I couldn't agree more.

That's why I've spent the past 10 years fine-tuning and proving my method so you can start making profits right away! I've perfected my method ... I've struggled through the trial-and-error so you don't have to!

All you have to do is follow my simple, step-by-step instructions.

That's why you'll find ...

“Fantastic! No trader should be in the markets without this.”

-- Nelson S., CA

Look. You didn't get this Special Report by accident. It didn't arrive in your mail box by chance. I've sent you this Special Report because I believe you are the type of investor who would like to supercharge your investment results with much larger and faster profits.

That's why I am offering you this special invitation to add my wealth-building secret to your portfolio and watch your profits skyrocket ... Absolutely Risk-Free!

With your permission, I will send you my complete methods and actual investment picks to use in your own home for 90 days at NO RISK to you. In fact, I give you my personal double guarantee:

1. You will learn this incredibly powerful and profitable method well enough to apply it to your own personal trading program within hours of receiving it ... and
2. You won't risk one penny proving to yourself beyond all doubt that you are making these huge profits by following my exclusive "paper trading" guide.

If you aren't convinced you will easily make incredible profits of 100%, 200%, 300% and more with my system ... you won't pay one cent and the matter will be over!

The secret to incredible investment profits trading your own very favorite companies is trading stock "options".

NOT the complex, risky options you may have heard of, but **options done a whole new easy, proven way -- my "Wealth Without Worry" way -- called Optionetics!**

In fact, my Optionetics is so easy, you will learn the basics in just a few hours and make LOW RISK, HIGH PROFIT trades "working" just 10 minutes a day ... starting the very first day!

And remember, these are not ordinary stock trades that make you 15% to 25% in a year. **These are powerful trades that can double or triple your money ... in as little as 60 to 90 days!**

Trading involves risk including possible loss of principal and other costs. Your trading results will vary.

Optionetics = Options Made Easy

With my Optionetics methods, there's nothing new for you to learn about stocks or the market. You will learn how to buy the high-leverage options on the exact same stocks you like right now.

Only instead of taking a year or more to make 10% - 25% returns ... you can be making double and triple your money every 60 - 90 days!

DELL COMPUTER (NASDAQ:DELL) Current Price \$41		
Call Option Strike Price	Expires 3rd Friday of The Listed Month	Cost
\$45	Aug	\$3
\$45	Sept	\$6
\$50	Aug	\$1
\$50	Sept	\$3

Plus I'll teach you my proven method for picking easy high-profit option winners you'd have never thought of. All you need 10 minutes a day with a newspaper, a pencil and my proven method.

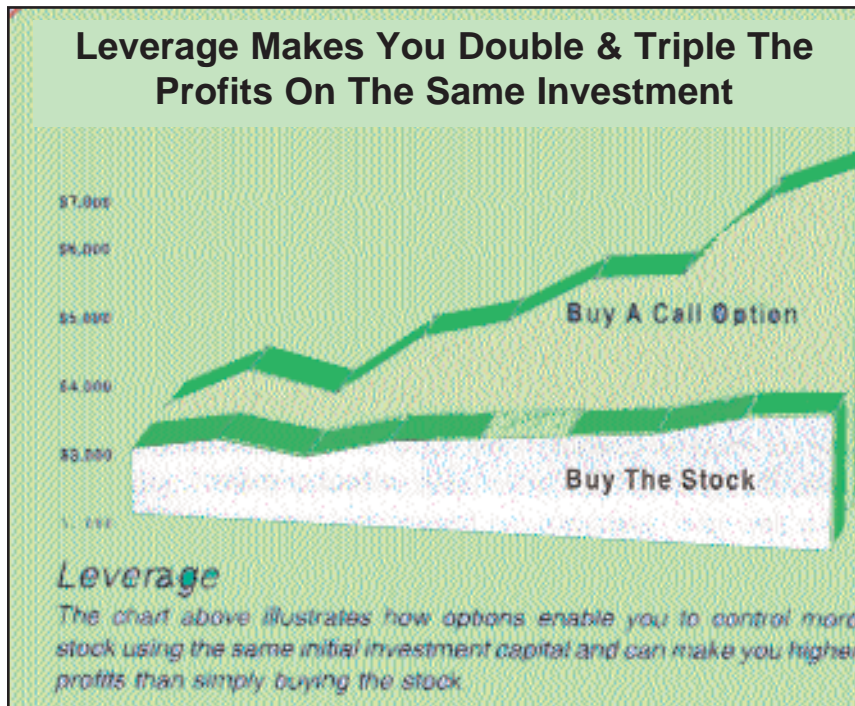

Here's how options work, in a nutshell. Take a look at this sample options page from your newspaper:

This call option means you control the right to buy 100 shares of DELL stock for only \$1 a share, or \$100.

If DELL stock rises to \$50 a share before the last Friday in August, your \$1 Call Option will be worth about \$3 ... and you will make 3 times your investment for a 200% PROFIT! (If you just buy the stock, your investment and risk is the full \$4,100, and your profit would only be 23%)

And here's the real beauty ... even if Dell stock does NOT reach the \$50 a share strike price -- but it does rise -- you will still make a much higher profit than if you'd just bought the stock!

“Congratulations -- finally someone in the industry who can explain strategies that work. Also, it is comforting learning from someone who actually does what he teaches.” -- P.G., IL

The Simple Reason Why Options Can Make Up To 10 Times Your Money ... Or More ... For The Same Investment As Stocks: Leverage

There's nothing quite like options in the world of investing. No other investment tool allows you to control so much stock for so little

money! By reducing the amount of money required for each transaction, your risk can be significantly limited. Or by investing a pre-determined dollar amount in options instead of stocks, your profit potential is significantly magnified. Here's why:

If IBM is selling for \$155 a share, it will cost you \$15,500 to buy 100 shares. But to buy the options on 100 shares may only cost you \$450. Your investment is next to nothing. Yet even a tiny, 5% up move in the stock price will make the option price soar! You make double and triple your money with controlled risk.

**So What Would You Rather Do:
Risk \$5,000 to make \$1,250 (25%) profit, or
Risk \$550 to make \$1,450 (263%) profit?**

Let's look at the numbers.

Say your stock is selling for \$50 and you buy 100 shares. You now have \$5,000 invested. If your stock increases in value by 25% over the next year, **you make a profit of 25%.**

But to control the same 100 shares with my "Wealth Without

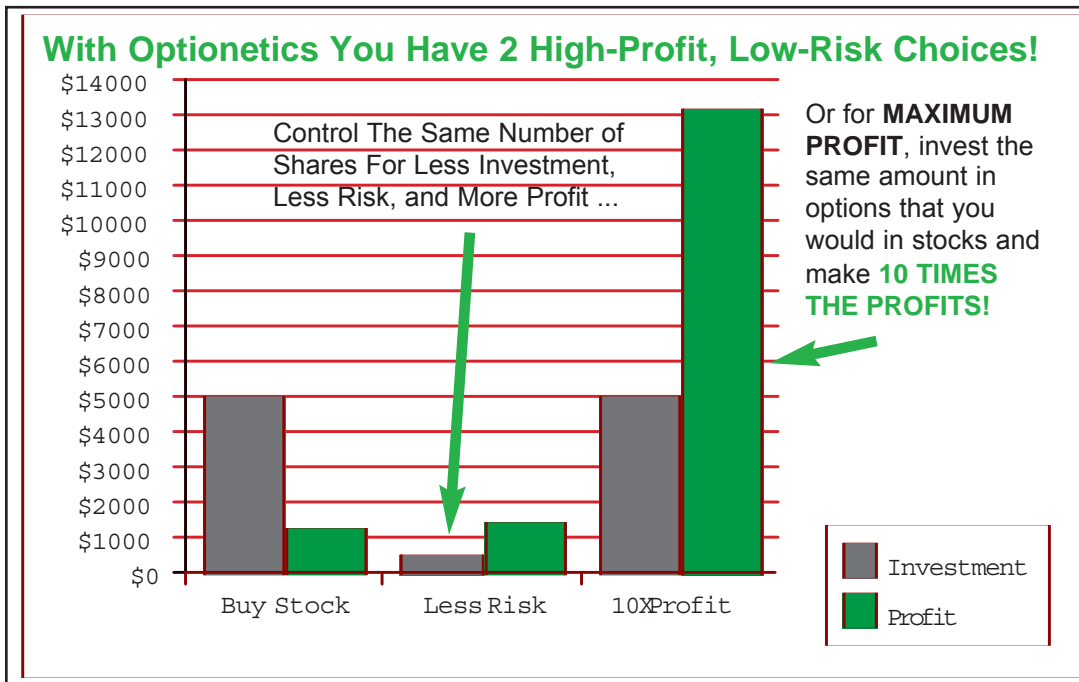

375% RETURN ON INVESTMENT IN 14 DAYS!

Profit Made: \$9,375

Initial Investment: \$2,500

Company: Valujet

Return on Investment: 375%

Worry" Optionetics method, your cost is only \$550. And when the stock rises 25%, your option rises much more than that. **You could make a profit of 263%! That's over 10 times the profit than if you bought the stock!**

You see, my Optionetics method is the difference between investing \$5,000 to make only \$1,250 on the stock or investing only \$550 to make \$1,450 on the option! **THAT'S HOW EASILY YOU MAKE MUCH MORE PROFIT WITH MUCH LESS RISK!**

And That's Not All! It's also easy to use my Optionetics methods for FAST, EXTREME PROFITS ...

Simply invest the same \$5,000 with my Optionetics method that you would have invested in the stock. Then instead of making \$1,450, you could make around \$13,000! **THAT'S ALMOST 10 TIMES THE PROFIT FOR YOU FOR THE SAME INVESTMENT!**

Every Smart Investor Should Include This Easy, Proven Investment That Can Double and Triple Your Money ... On Your Favorite Stocks ... Every 60-90 Days With Very Little Risk

“George made me realize that anyone could master the markets by using the right techniques, guaranteeing a steady cash flow without the constant stress many traders feel.” -- Angie B., IL

OPTIONS VS. STOCKS		
<u>CHARACTERISTIC</u>	<u>OPTION</u>	<u>STOCK</u>
Can be easily researched using newspaper	YES	YES
Increases in value when the price of the stock rises	YES	YES
Can be purchased through on-line or full-service brokers	YES	YES
Can be bought for less than 10% of the stock value	YES	NO
Can double in value when the stock moves as little as 10%	YES	NO

Take a look at the chart on the next page and you'll see that options give you a world of advantages over stock investing.

First of all, they're inexpensive, so you can get in and dabble all you want with very little investment. And their tremendous leverage enables you to control large amounts of stock for pennies on the dollar, so you earn huge profits for even small movements in the stock.

And what's really important is that you don't have to wait years or decades to collect enormous profits. In fact, most options trades yield their profits in less than 90 days! That means you can count on reaching your retirement goals much sooner and with much greater certainty.

**What Will Happen To Your Plans For A Luxurious
Early Retirement If Your Stock Investments
Don't Pay-off As Fast Or As Well As You Planned?**

No doubt, investing in stocks has proven to be a successful, long-term strategy for accumulating wealth. And this is certainly an exciting time to be in the stock market.

I love the stock market. It has made me and thousands of my students very wealthy. That's why I would never suggest you abandon your current stock plan. I will never tell you to dump your stocks.

But as part of a well-diversified portfolio, you need to include options if you want fast, risk-managed trades with high profit potential. You need to include options if you want to reach your financial goals without delay.

DOUBLED MY MONEY IN 19 DAYS!

Let's face it, we're riding a great wave. But sooner or later things will slow. The economy will drag. Stocks will drop off. If you only have stocks to rely on for your future, it may take you much longer to reach your goals -- and even delay your plans for retiring early and wealthy.

You Can Make Huge Profits Whether The Market Goes Up Or Down

Unlike buying stocks, with my Optionetics methods you never have to put your future on hold just because of a market downturn.

When you own stocks and mutual funds and the market takes a 25% dip, so does your portfolio. You just have to hold on to your hat and go along for the ride ... hoping things recover and improve by the time you need the money.

But with my Optionetics methods, you'll learn how to purchase options that make you the same 100%, 200%, 300% and more profits even if the price of the underlying stock drops! That's why I call it "Wealth Without Worry"!

You'll Sleep Like A Baby Every Night

There is nothing more stressful than being in a position of unlimited risk. And the more stressed you are, the more confused you can become. For the investor, stress inevitably leads to poor decision-making, losses, and lack of sleep.

But with my Optionetics "Wealth Without Worry" course, you CONTROL the risk -- it does not control you. You will use my methods to easily calculate the risk on every investment before you make it. You already know you have leverage in your favor. You already know you can hit for 200%, 300% and more profits. So all you have to do is decide what's right for you and place your trade. Then sleep like a baby every night eagerly anticipating the profits of your dreams!

You Will Be Comfortable Making Huge Profits Before You Ever Risk One Cent Of Your Own Money!

To help you get comfortable with this, you can practice the

"I have been using Optionetics strategies for over a year. In one trade, I made over \$45,000 or 250% in less than 2 weeks. In another trade, I was able to make 50% on Intel when the market crashed." -- Mike S., CA

Optionetics strategy using the Paper Trading Practice Guide that you will get as part of your Optionetics "Wealth Without Worry" course.

Each sheet of the Guide walks you step-by-step through the mechanics of my Optionetics trading strategy. Once you locate a potentially profitable investment, you can record it in the Guide and track your progress and profits.

With my Paper Trading Guide, you can check-out the results of my Optionetics Methods for a full 90 days without ever spending one cent of your own money.

You can prove to yourself -- beyond all shadow of doubt-- that you will make the huge profits I say you will, without one cent of your own money at stake.

I should warn you, however, that most of my students never make it the full 90 days in the Paper Trading Guide. Once you see the huge profits ... once you see how easy it is to spot your own winners ... once you see the power of leverage working for you on paper ... you'll want to get your real money raking in real profits for yourself as fast as you can!

And of course with my iron-clad, no-risk, money-back guarantee, you get every dime back with NO QUESTIONS ASKED if your profits -- paper or real -- aren't exactly as I say. You can't lose! You can only win BIG!

Your Friends Won't Believe Their Ears

You know how some people like to talk around the pool, on the tee, or over dinner. You know how they like to "let you in" on their latest stock that made them 15%, 25%, even 50% profit last year.

Well imagine the look on their faces when you casually mention that you discovered a new method that made you 150%, 250% even 500% profit ... in less than 90 days!

I know you'll be smiling all the way to the bank because these are the kind of profits that will change your life. These are the kind of profits that can very quickly provide you

Trading involves risk including possible loss of principal and other costs. Your trading results will vary.
